

KEEP GREASE OUT OF THE SYSTEM

# OIL-WATER SEPARATOR (OWS) PERMITTING CHECKLIST

**USE THE CHECKLIST TO HELP GUIDE YOUR BUSINESSES THROUGH THE OIL-WATER SEPARATOR PRETREATMENT PERMITTING PROCESS AND TO PROVIDE ALL REQUIRED DOCUMENTS**

## ALL INFORMATION BELOW MUST BE RECEIVED TO PRIOR TO OWS INSTALLATION

The type(s) of oil-water separators (s) (e.g. baffle type or coalescing plate separator).

Number of oil-water separators and the capacity for each device (e.g., gallons).

Submit plumbing plans through the [Spokane County Portal Account](#) that include pipes and fixtures (both internal and external) from grease-receiving waste streams (e.g., trench drains, floor drains) that are connected to the oil-water separator. **Do not include non-grease receiving fixtures** (e.g. toilets, ice machines, bathroom floor drains) in the plans.

Include the type of oil-water separator, the manufacturer and model of device, and location of the device on the plans.

## GUIDES FOR DETERMINING THE SIZE OF OWS CAN BE CALCULATED USING:

- ◇ IAPMO Standards IGC 183-2016 (Oil/Water Separators and Coalescing Plate Separators)
- ◇ Oil-Water Separator Sizing Reference (2019 Stormwater Management Manual for Eastern Washington)

## OWS MAINTENANCE REQUIREMENTS AND DISPOSAL INFORMATION ARE FOUND IN:

- ◇ Oil-Water Separator Fact Sheet

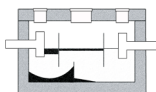

Please fill out and once completed, submit via the [Spokane County Plan Review Submittal](#) page.
