

SALTESE WETLANDS ANIMAL GUIDE

ANIMALS

CAROLINA MANTIS
Stagmomantis carolina

ELK
Cervus elaphu

GARTER SNAKE
Thamnophis

NORTHWEST WHITE-TAILED DEER
Odocoileus virginianus ochrourus

NORTHERN GREEN FROG
Rana Lithobates clamitans

RIVER OTTER
Lontra canadensis

EASTERN PONDHAWK
Erythemis simplicicollis

MARMOT
Marmota

MEADOW GRASSHOPPER
Pseudochorthippus parallelus

PAINTED TURTLE
Chrysemys picta

WESTERN TOAD
Bufo borea

LONG TOED SALAMANDER
Ambystoma macrodactylum

SALTESE WETLANDS PLANT GUIDE

PLANTS

Wetland plants are incredible for a number of reasons! These plants are specially adapted to the water. They are known as *hydrophytes*, or water loving! The types of plants you see will depend on what type of wetland you are in. These plants help slow the flow of water into the wetland, controlling floods. They also filter toxins through their roots!

KEEP A LOOKOUT FOR *OTHER PLANTS SURROUNDING THE WETLAND AS WELL THAT ARE NOT AQUATIC, LIKE PINE TREES. THESE PLANTS ARE IMPORTANT HABITAT FOR BIRDS AND OTHER MAMMALS AS WELL.*
